LIFE ITALIA *Kids*

Comfort, safety and durability

Created to meet the needs of parents and their little ones,
the Life Italia Kids eyewear collection offers unsurpassed durability,
a comfortable fit and adorable style.

Featuring the innovative “Multi-Flex” technology,
this advanced collection delivers fashion and function.

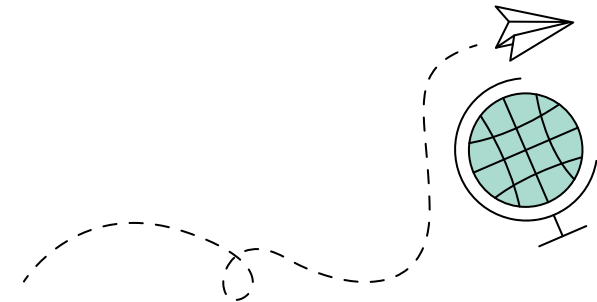

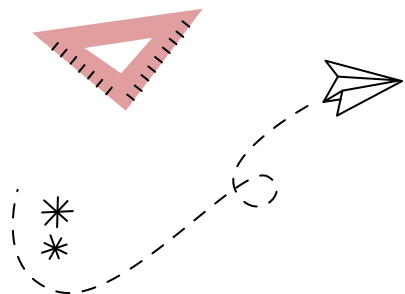

"Multi-Flex" hinge

Designed in-house 12 years ago, our "Multi-Flex" hinge has the ability to flex 270° and jump back to its original position, offering unparalleled flexibility and greater durability thank to the use of Medical Rubber.

The result is safe, functional eyewear with less need for replacement of broken temples.

New Medical Rubber

Our new Life Italia Kids collection is manufactured using Medical Rubber, this revolutionary material is completely anti-allergenic which means parents can rest assured their Kids aren't putting any harmful chemicals in their mouth, skin, or eyes.

Our Medical Rubber provides flexibility, strength and high performance with a pleasant, "soft touch" feel.

Our extensive research over the years and collaboration with pediatrics optometrists indicate the importance of safety, durability and comfort to parents when it comes to their child's eyewear.

Add to that, our touch of fresh colours, design and commitment to a positive experience to understand why Life Italia Kids eyewear sets itself apart from other collections.

LIFE ITALIA *Kids* 

Optometry Frames

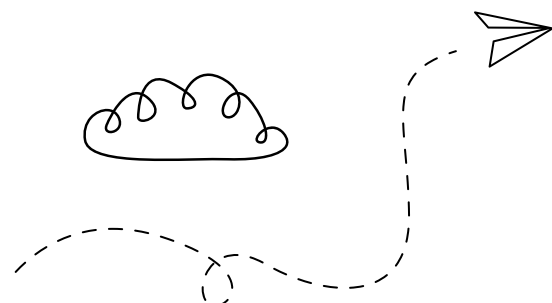

Life Italia Kids **Trial frame** has a mechanism that will make it possible to **define the astigmatism axis**.

It is light and comfortable and is the right solution for solving children's refraction problems.

It fits the children's facial cranial measurements. The frame remains **well centered** on the patient's face between 2 and 4 years old.

This will allow to make a full vision test. The **lens holding rings** accept up to **three standard 38 mm lenses**.

LIFE ITALIA Kids 

COMFORT, SAFETY, DURABILITY AND SUN PROTECTION

Created to meet the needs of parents and their little ones,
the Life Italia Kids eyewear collection offers unsurpassed durability,
a comfortable fit and adorable style.

Featuring the innovative “ThermoTech” technology,
this advanced collection delivers fashion and function.

THERMOTECH

Always looking into new materials for the safety of our loved ones.

We have developed a new sunglasses collection using Thermoplastics and a new material called 'ThermoTech'. A material that combines both Crystalline and amorphous segments to offer unique properties of thermoset elastomers.

Soft to the skin and high impact resistant.

In easy words, ThermoTech is a fantastic material that's very flexible, that combines toughness, resilience, as well as high impact resistance.

The material elastomers give high performance for both high and low temperatures.

So they are ideal for outdoor activities and sports.

LENS QUALITY: POLARIZED + UV TREATMENTS

We take special care of our kids, our lenses provide UV block treatment to prevent premature aging of the eyes. Children have a tendency to look directly into the sun and we need to block all UV harmful rays.

Our lenses are also Polarized helping to remove any unwanted light rays that can distort clarity, create vision distress and reduce overall vision field.
